PUT MORE POWER IN YOUR REPORTS.

TAKE YOUR REPORTS TO A NEW LEVEL.

Quality and efficiency of reporting have emerged as major factors in the success of radiology practices. For today’s referring physicians, oncologists and other clinicians to send a growing number of patients your way, they’ll be looking at your reports for several key benefits.

Sure, they want fast turnaround times, but more important, these referrings want reports with greater clinical value and insight. Vue Reporting delivers both of these key advantages. It’s a tool that will help you position yourself as a radiologist of choice.

“Reporting is really crucial to us – it’s become a major driver for our business.”

Dr. Andrew Deutsch, President
Renaissance Imaging Medical Associates
Northridge, CA

Clinical Insight Delivered.

“Text-only” reports will soon go the way of the dinosaurs – they simply can’t provide the insight and value that referring doctors need. Even in reports that include “structured findings” and current measurements, the physician must still find the prior report and manually compare the images.

No longer. With Vue, you can offer a seamless follow-up approach for oncology and other high-value modalities. With advanced clinical tools such as our PowerViewer or Lesion Management capabilities, your reports can offer referring physicians embedded key images for side-by-side comparison, modality measurements, exam dosage information, tumor trending information in charts and graphs, and quantitative data from advanced post-processing, such as vessel analysis.

Reports can also include hyperlinks to specific anatomical bookmarks or key measurements. The radiologist or referring physician can quickly access the pertinent information in PACS or through our referring-physician portal, Vue Motion.

In short, you’re providing physicians with precisely the data they need at the point of care – leading them to regard you as an important colleague who provides valuable information. Increased referrals are bound to follow.

The Speed of Embedded Voice Recognition.

Like every imaging department, you’re under pressure to decrease your report turnaround times – because your referring doctors’ priorities are rapid diagnosis and the start of treatment. This challenge is magnified in multi-site or multi-system environments, where radiologists must master multiple interfaces and systems.

Here’s the answer. Vue Reporting, with embedded voice recognition capability, can help cut your turnaround time to the bare minimum. It entirely eliminates the need for typing and entry of patient or clinical context. Exam data can be inserted directly into reports. This allows radiologists to quickly review and approve final reports, while adding clinical context for referring physicians.

How Easy Is This?

With user-defined templates and structured reports, a microphone is all you need:

1. Pick up the microphone and dictate.
   - No keyboard needed – the cursor moves via spoken commands.
   - No entry of patient or clinical context, measurements or dosage data is required.
   - It’s all automatically populated.
   - As you mark key images or perform advanced post-processing, the analyses or data are captured directly into the report.

2. Review and approve the report and sign off.

That’s it! The report is on its way to other clinicians – across town or around the world – allowing close consultation and collaboration. All recipients will be able to view the exam’s key images and hyperlinks in the report – a benefit other vendors’ systems can’t provide.
CLINICAL KNOWLEDGE THROUGHOUT THE ENTERPRISE.

**RADIOLOGISTS**

A Single Reading + Reporting Workspace
- Reporting from anywhere where images can be viewed
- Less work and errors with simple, structured reports
- Fast evaluation and quality reporting via access to priors with hyperlinks

**IT**

Simplified Deployment in Single or Multi-site Environments
- No need for special drivers or third-party software
- Less integration
- Simpler deployment and upgrades

**REFERRING PHYSICIANS**

Clinically Rich Content with Smart Navigation
- Multimedia reports, including key images and charts
- Smart and intuitive hyperlink navigation
- Value-added communication with patients

**PATIENTS**

Empowered and Included in the Process
- Reduces need for CDs or DVDs
- Secure access and management to own results
- Value added through innovative patient services

**ADMINISTRATORS**

Reduced Costs and Better Outcomes
- Elimination of third-party dictation system costs
-Quicker report turnaround, allowing better service to referring physicians and clinicians
- Single system for ease of administration and training

“Voice Recognition has been a revelation. It was easy to implement and it adapted well to our voices. In one of our sites, Vue Reporting has brought reporting time down from a week to about three hours.”

HSE – Midland Area, Ireland
In the contemporary Radiology Department, knowledge is everything. With Vue, you’ll know that the issues crucial to your success are being addressed. Vue amplifies the clinical, business and IT value of radiology by:

• Offering greater value and insight as you generate clinically rich reports.
• Increasing patient engagement and satisfaction with an intuitive patient portal.
• Controlling costs and streamlining data flow with modular components within the platform.
• Fostering clinical collaboration without boundaries.

Most important, Vue offers a single, flexible, customizable platform. It lets you make the right investment now – and build on that investment in the future.

A Community of Service and Support

For dependable service, look to our Customer Success Network. We work continuously to improve your imaging performance, help you to innovate as needs change, and make the most of your budget and resources. Carestream’s Customer Success Network surrounds you with a dynamic team of experts, with a Single Point of Entry for easy, customized access to the right people in every situation. You and your patients will benefit from the expertise and best practices only Carestream can deliver – based on thousands of customer engagements worldwide and our 100-year heritage in medical-imaging innovation.
