Enterprise Viewer Module  
Vue Motion Technology

# Intuitive. Enterprise. Access.

Provide Seamless Sharing of Clinical Data.

*The power of together.*

The power of together.

## Anytime, Anywhere Data Access.

The Enterprise Viewer, a module of the CARESTREAM Clinical Collaboration Platform, can be integrated with any DICOM PACS, DICOM Archive or XDS Repository. This Universal Viewer provides physicians with simple access to enterprise data: radiology and cardiology images, diagnostic ECG, PDFs, JPG, MOV, MP4 and CCDs. Image-enable your EMR when you embed this intuitive viewer – which requires no download or dedicated training – so it can be quickly deployed enterprise-wide.

## Advantages At a Glance

- No local installation or download required.
- No dedicated training required with a single, intuitive user interface.
- FDA approved for clinical reading, even on mobile devices.
- Universal viewer that's vendor agnostic, an XDS consumer that can display DICOM or non-DICOM data side by side.
- Zero-footprint lightweight viewer, no local installation or download required.
- New communication capabilities, such as chat and screen sharing between clinicians and radiologists who use the Enterprise Viewer Module.
- Advanced sharing capabilities to share images in a secure and easier way.
- Interactive reporting hyperlinks.

## Simple and On-Demand Physician Access

Regardless of location, authorized users such as the referring physician can use the Enterprise Viewer to access the entire imaging patient portfolio. Pure-Web and platform-independent technologies provide access from multiple operating systems and via a Web browser with operating platforms utilizing HTML5, including PCs, Mac and validated mobile devices.

## Advanced Image Viewing

The Enterprise Viewer offers advanced clinical tools such as real-time 3D post-processing, MPR and volumetric comparisons, synchronized scrolling between data sets for quick reference, and native ECG viewing. It also includes side-by-side comparison of DICOM and Non-DICOM data.

## Enhanced Collaboration

Working in concert with other clinicians can be essential for high-quality patient care. Enterprise Viewer encourages collaboration using chat, live screen-sharing between clinicians, and supports sticky notes communication – including indication of critical results. And, with a single click physicians can email a link to an exam to colleagues across town or across the country – to expedite second opinions. Moreover, in an environment such as teleradiology, the clinician can enter order information, such as reason for the exam, and the Enterprise Viewer will synchronize this key data with the study.

## Intuitive Design Allows Rapid Expertise

With the Enterprise Viewer's intuitive operation, users require no application training. Zero-footprint design eliminates application software installation and maintenance. The clinician's viewing experience is enhanced with high-speed performance – because the pure Web-based technology is supported by advanced back-end rendering and streaming capabilities.

## Image Enable EMR

Available as an independent viewer, the Enterprise Viewer Module can also be integrated within an EMR or EHR portal as an embedded application. Or, it can be utilized in a separate window through URL activation. Either way, multiple logins are eliminated, saving end-users time when accessing critical patient information. The Enterprise Viewer also includes Web access to view data directly.

## A Comprehensive View

The Enterprise Viewer makes it easy for physicians to consult the patient's entire clinical portfolio, as well as access data originated from a variety of clinical systems. Supported data include radiology and cardiology images, diagnostic native ECG, PDFs, JPG, MOV, MP4 and CCDs.

# Be Mobile.

Image-enable your EMR when you embed the Enterprise Viewer Module on your mobile phone, tablet or laptop. No download or dedicated training required means that it can be quickly deployed enterprise-wide.

## Intuitive Design

It's easy to open the priors, and disparate medical files are supported in the same view.

## Multimedia Report

Interactive reporting hyperlinks are displayed on the screen for fast access.

## Mobile Support

FDA approved for clinical reading, even on mobile devices.

## Vendor-Agnostic Viewer

Simple access to enterprise data: radiology and cardiology images, diagnostic ECG, PDFs, JPG, MOV, MP4 and CCDs.

### Carestream's Clinical Collaboration Platform.

Intuitive clinical content-management workflow across the entire enterprise.

Clinical Collaboration Platform gives all those who provide, manage, receive and reimburse care the ability to access the clinical data and images they need – using the preferred platform and screen for each workflow and setting.

Through full integration with the enterprise's electronic medical or health record, meaningful clinical data within its appropriate context is always available for delivery to key stakeholders. Across disparate sites and networks. Between departments and information technologies. Among providers and payers. Around each episode of care and each patient's clinical history.

Carestream does more than integrate data and systems. We allow each stakeholder to view the patient's complete imaging record, including priors – closing knowledge gaps that would otherwise be created by disjointed systems and data sources. We enable transparency. And we help your teams collaborate around a shared goal: putting patients at the center of efficient, effective healthcare.

#### Want to learn more about the Platform?

Visit [carestream.com/collaboration](http://carestream.com/collaboration) to see how *the power of together* can help you provide true patient-centric care.

Carestream also offers leading-edge image capture solutions across a wide array of modalities. The gold standard in X-ray film. And, when it comes to digital output, our laser imagers and self-service kiosk provide high-quality solutions for all imaging modalities.

### A Community of Service and Support.

For dependable service, look for our Customer Success Network.

We work continuously to improve your imaging performance, help you to innovate as needs change, and make the most of your budget

and resources. Carestream's Customer Success Network surrounds you with a dynamic team of experts, with a Single Point of Entry for easy, customized access to the right people in every situation. You and your patients will benefit from the expertise and best practices only Carestream can deliver – based on thousands of customer engagements worldwide and our 100-year heritage in medical-imaging innovation.
