

# Carestream

A GLOBAL IMAGING + IT LEADER.

CAREERS AT CARESTREAM  
FOCUS ON YOUR SUCCESS.

# WHO IS CARESTREAM?

Carestream Health is a world-class, global corporation with over 100 years of leadership in healthcare innovation. We are over 7,000 professionals strong – all striving to increase the quality of care for patients in over 170 countries. This dedication helps us achieve billions of dollars in annual revenues.

As an industry thought leader, we're tuned in to the trends and challenges in the field. We respond with timely, game-changing, healthcare imaging and IT solutions. All backed by unsurpassed service and support.

Carestream is committed to helping our customers remain at the forefront of medical imaging – achieving higher productivity, effective cost control and outstanding patient care.

We're looking for individuals with the passion to help us meet our goals for patient care.

## DIGITAL MEDICAL SOLUTIONS

Digital Medical Solutions (DMS) includes medical imaging and Healthcare IT. These solutions include research and development, manufacturing sales and service that serve customers around the world. DMS manufactures and markets computed and digital radiography X-ray equipment, analog systems, ultrasound, fluoroscopy, and RIS, PACS and Archiving software solutions.

## NON-DESTRUCTIVE TESTING

Non-destructive testing (NDT) is a way of examining objects, materials and systems without damaging their future usefulness by adapting existing X-ray technology for use in the industrial space. NDT is used to examine pipelines, refineries and offshore drilling platforms for defects and corrosion. The aircraft and aerospace industry also use NDT to inspect components. Many other products, including electronic parts, tires, medical devices, vehicle parts and more, are inspected using NDT.

## DENTAL IMAGING AND PRACTICE-MANAGEMENT SOLUTIONS

Providing industry-leading dental equipment such as imaging systems and practice-management solutions for dental and oral health professionals across the globe, Carestream Dental's products are used by seven out of 10 practitioners, and deliver more precise diagnoses, improved workflow and superior patient care.

## ADVANCED MATERIALS AND CONTRACT MANUFACTURING

**FLEXX Transparent Conductive Films (TCFs)** are specifically designed to enable the fast-moving future of touch technology. Consumers want thin, lightweight and flexible devices with a large display, superior optical performance and long battery life.

**Contract Manufacturing** offers precision toll coating services, specializing in the application of aqueous and solvent coatings on flexible substrates for a wide range of industrial, medical, electronic and other advanced materials applications.

Carestream has Business, Manufacturing, R&D and Technology and Innovation Centers around the world.

Our products are in over 170 countries.

Healthcare IT

# WHAT'S NEW AT CARESTREAM?

**CARESTREAM Touch Prime Ultrasound**  
With a configurable All-Touch control panel, this system offers intuitive operation, innovative productivity tools and advanced image quality.

**CARESTREAM DRX-Excel Plus** This is an innovative combination of fluoroscopy and general radiology in one compact system. It delivers accelerated workflow and high-resolution images.

**Clinical Collaboration Platform** Our uniquely designed software platform provides fast, easy access to patient images and data – for collaboration across the entire healthcare enterprise.
