SMART.
SIMPLE.
SECURE.

CARESTREAM Managed Print Solutions – Uniquely Designed for Your Peace of Mind.

With all that's required to keep your facility running smoothly, you and your staff have enough responsibilities. Ordering supplies. Tracking inventory. Managing budgets. Coordinating service. These all can pull you away from focusing your expertise where it really belongs – and that can mean lower productivity.

This problem can be solved – and Carestream has the answer. It's a comprehensive, Web-based program that eliminates capital outlay, provides consistent budgeting and delivers turnkey capabilities for image processing. This innovative answer offers benefits to everyone on your staff – from the rad tech to the radiology manager, from the procurement officer to the finance executive.

A NEW, INNOVATIVE, WEB-BASED IDEA COMES TO HEALTH IMAGING.

Meet CARESTREAM Managed Print Solutions (MPS) – a comprehensive, Web-based, pay-per-print program. We take responsibility for virtually everything – from monitoring and delivering your consumables to providing the latest DRYVIEW equipment, software updates and unsurpassed service.

Save Every Time You Print.

How would you like to take some of the strain off your budget? You can, with CARESTREAM Managed Print Solutions. You'll enjoy a lower cost of operation over time, because your price per print includes it all: laser imager, film, shipping and service.

The ongoing expenses eliminated or minimized can include:

- Costly expedited shipments due to unforeseen film shortages
- Staff hours spent on repetitive PO generation and film purchase administration
- Cost of mailing checks and reconciling invoices
- Unplanned expenditures for service requests and critical parts replacements
- The costs of inventory management

Everything You Need is Provided.

Following a thorough analysis of your printing infrastructure, we'll present you with a customized, strategic print-management plan. Then, we'll deliver a 100% turnkey solution that includes:

- A DRYVIEW Laser Imager matched to your printing environment
- DRYVIEW Laser Imaging Film
- Access to our exclusive Web Portal
- Dedicated customer service support
- User demonstration and training
- Service coverage for the term of your agreement

The Information You Need, When You Need It.

Our exclusive Web Portal eliminates surprises and the administrative overhead of managing film usage, inventory tracking, procurement and billing. CARESTREAM Smart Link remote technology tracks your equipment and film usage data by printer, size or location – and displays it on a dashboard accessible at any time, from anywhere. This allows you to reference contract and billing statements, inventory records and film shipment status – the crucial information you need to make informed business decisions.

Benefits at a Glance

Just hit “print” – that’s all there is to it.

- Web-based, turnkey solution
- No capital investment
- Lower administrative costs
- Reduced operational costs over time
- Easy budget planning
- Continually replenished film inventory
- The convenience of electronic payments
- Solid security and data protection
- World-class service and support

A PARTNER
WHO CARES
AS MUCH AS
YOU DO.

Protecting Patient Privacy and Network Security

We know that patient privacy and network security are critical issues. No confidential patient data is ever transmitted or received. To maintain secure communications, we employ globally accepted Internet security protocols. Only trained and properly credentialed Carestream Support Specialists are permitted to connect with your printer. An audit trail of printer access and activity is maintained, and the latest, most advanced virus protection is always in place.

Your Customer Success Network

When you partner with Carestream, you are at the center of an extensive and experienced Customer Success Network – one that's easily accessible through a Single Point of Entry. CARESTREAM Smart Link remote technology creates a powerful bridge between your Carestream solutions and Carestream's Customer Success Network.

We're passionately focused on keeping your systems up, running and productive. Let us help you reach your performance goals – by giving you the competitive edge to attract and satisfy more patients.
