

Manufacturer Disclosure Statement for Medical Device Security – MDS²

Device Category: 16512	Manufacturer: Eastman Kodak	Document ID: 5H8305	Document Release Date: 12/31/2005
Device Model: DirectView CR 500/800/825/850/900/950/975 and ROP	Software Revision: 4.5	Software Release Date: 11/23/05	
Manufacturer or Representative Contact Information:	Name: Technical Support	Title: N/A	Department: US&C Service
	Company Name: Eastman Kodak	Telephone #: 1-800-328-2910	e-mail: health.imaging.tsc@kodak.com

MANAGEMENT OF ELECTRONIC PROTECTED HEALTH INFORMATION (ePHI) *As defined by HIPAA Security Rule, 45 CFR Part 164* **Yes No N/A Note #**

1. Can this device transmit or maintain *electronic Protected Health Information (ePHI)*? Yes No N/A Note #
2. Types of ePHI data elements that can be maintained by the device:
 - a. Demographic (e.g., name, address, location, unique identification number)? Yes No N/A
 - b. Medical record (e.g., medical record #, account #, test or treatment date, device identification number)? Yes No N/A
 - c. Diagnostic/therapeutic (e.g., photo/radiograph, test results, or physiologic data with identifying characteristics)? .. Yes No N/A
 - d. Open, unstructured text entered by device user/operator? Yes No N/A
3. Maintaining ePHI: *Can the device*
 - a. Maintain ePHI temporarily in volatile memory (i.e., until cleared on by power-off or reset)?..... Yes No N/A
 - b. Store ePHI persistently on local media?..... Yes No N/A
 - c. Import/export ePHI with other systems? Yes No N/A
4. Mechanisms used for the transmitting, importing/exporting of ePHI: *Can the device*
 - a. Display ePHI (e.g., video display)? Yes No N/A
 - b. Generate hardcopy reports or images containing ePHI? Yes No N/A
 - c. Retrieve ePHI from or record ePHI to removable media (e.g., disk, DVD, CD-ROM, tape, CF/SD card, memory stick)? .. Yes No N/A
 - d. Transmit/receive or import/export ePHI via dedicated cable connection (e.g., IEEE 1073, serial port, USB, FireWire)? ... No Yes N/A
 - e. Transmit/receive ePHI via a network connection (e.g., LAN, WAN, VPN, intranet, Internet)? Yes No N/A
 - f. Transmit/receive ePHI via an integrated wireless connection (e.g., WiFi, Bluetooth, infrared)? No Yes N/A
 - g. Other _____ ? N/A

ADMINISTRATIVE SAFEGUARDS **Yes No N/A Note #**

5. Does manufacturer offer operator and technical support training or documentation on device security features?..... Yes No N/A Note # 1
6. What underlying operating system(s) (including version number) are used by the device? Microsoft Windows 2000 SP4 _____

PHYSICAL SAFEGUARDS **Yes No N/A Note #**

7. Are all device components maintaining ePHI (other than removable media) physically secure (i.e., cannot remove without tools)? Yes No N/A Note # 2, 3, 4
8. Does the device have an integral data backup capability (i.e., backup onto removable media such as tape, disk)? Yes No N/A Note # 6
9. Can the device boot from uncontrolled or removable media (i.e., a source other than an internal drive or memory component)? Yes No N/A Note # 7

TECHNICAL SAFEGUARDS **Yes No N/A Note #**

10. Can software or hardware not authorized by the device manufacturer be installed on the device? Yes No N/A Note # _____
11. Can the device be serviced remotely (i.e., maintenance activities performed by service person via network or remote connection)? .. Yes No N/A Note # _____
 - a. Can the device restrict remote access to specific devices or network locations (e.g., specific IP addresses)? Yes No N/A
 - b. Can the device log provide an audit trail of remote-service activity? Yes No N/A
 - c. Can security patches or other software be installed remotely?..... Yes No N/A
12. Level of owner/operator service access to device operating system: *Can the device owner/operator*
 - a. Apply device manufacturer-validated security patches? Yes No N/A
 - b. Install or update antivirus software? No Yes N/A
 - c. Update virus definitions on manufacturer-installed antivirus software? No Yes N/A
 - d. Obtain administrative privileges (e.g., access operating system or application via local root or admin account)? .. Yes No N/A
13. Does the device support user/operator specific ID *and* password? Yes No N/A
14. Are access sessions terminated after a predetermined length of inactivity (e.g., auto logoff)? Yes No N/A
15. Events recorded in device audit log (e.g., user, date/time, action taken): *Can the audit log record*
 - a. Login and logout by users/operators? Yes No N/A
 - b. Viewing of ePHI? Yes No N/A
 - c. Creation, modification or deletion of ePHI? Yes No N/A
 - d. Import/export or transmittal/receipt of ePHI? Yes No N/A
16. Does the device incorporate an emergency access (“break-glass”) feature that logs each instance of use? No Yes N/A
17. Can the device maintain ePHI (e.g., by internal battery) during power service interruptions? Yes No N/A
18. Controls when exchanging ePHI with other devices:
 - a. Transmitted only via a physically secure connection (e.g., dedicated cable)? No Yes N/A
 - b. Encrypted prior to transmission via a network or removable media? No Yes N/A
 - c. Restricted to a fixed list of network addresses (i.e., host-based access control list)? Yes No N/A Note # 5
19. Does the device ensure the integrity of the ePHI data with implicit or explicit error detection/correction technology? Yes No N/A

†Recommend use of ECRI’s Universal Medical Device Nomenclature System (UMDNS).

Manufacturer Disclosure Statement for Medical Device Security – MDS²

RECOMMENDED SECURITY PRACTICES

Users must take steps to secure their networks and protect their Medical Information Systems which includes a risk assessment strategy, network defense in depth strategy, business continuity planning, etc.

EXPLANATORY NOTES (from questions 1 – 19):

IMPORTANT: Refer to Instructions for the Manufacturers Disclosure Statement for Medical Device Security for the proper interpretation of information provided in this form.

1. Kodak Health Group provides operator and technical training for the DirectView CR systems at our Dallas, TX facility. Service/technical documentation includes configuration guidelines for a certified service provider to configure the CR system activation of the software firewall services.
2. Valid Digital Certificate is required for service access (e.g. system modification, loading additional software, use of the CD or USB drives, etc.)
3. Access to the CD drive or USB ports would require the individual to open the access door and slide out the CPU. Normal operation of the CR system does not require the use of a keyboard; therefore no keyboard is attached to the system
4. The clinical user does not have access to the system desktop, limiting access to the Windows Operating System
5. The system limits transfer of ePHI through defined DICOM associations which requires defined IP addresses and AE Titles
6. CR Systems have the capability to complete a backup of configuration data via the floppy drive
7. CR Systems have boot capability via the CD drive
- 8.
