

## SMART TRANSDUCERS, BRILLIANT PERFORMANCE.

The CARESTREAM Touch Ultrasound Systems offer a full family of transducers for a wide range of imaging applications. Their remarkable ease-of-use begins with a unique *Smart Select* button, allowing quick, one-touch transducer activation. Advanced Smart Connect technology provides increased sensitivity and efficiency, with improved scanning across a broad selection of body types. To further enhance convenience and productivity, the pinless connectors are designed for easy, one-hand connection and disconnection.

## ADVANTAGES AT A GLANCE

- Specialized transducers are available for radiology, OB/GYN, musculoskeletal (MSK), and vascular imaging.
- Direct interface with the processing board delivers lower noise and higher image quality.
- Four transducers can be connected simultaneously to any of four ports.
- The single touch of a button allows freezing, storing and printing of images.
- Two-year warranty and accident protection plans enable maximum uptime and peace of mind.

## CARESTREAM Touch Ultrasound Systems Smart-Connect Transducers.

### The Right Transducer for Every Application.

With the Touch System, you'll never have to settle for a generic, less-than-ideal transducer. Our broad family of Smart Transducers includes an option specifically designed for a wide range of exams.

The unique *Smart Select* transducer button allows for quick activation and one-touch freezing, storing and printing of images.

Transducer	Application	Frequency Range (MHz)
6C2	Abdominal, OB/GYN, Pediatrics	2 – 6
18L5	Small Parts, Breast, MSK	5 – 18
E10C4	Endovaginal, Prostate	4 – 10
18L5s	Superficial Imaging, MSK	5 – 18
5P1	Abdominal	1 – 5
9C2	Abdominal, OB/GYN, Pediatrics	2 – 9
14L3	Small Parts, Breast, MSK, Vascular	3 – 14
13L4w	Small Parts, Breast, MSK (wide array)	4 – 13
N13C5	Neonatal	5 – 13
10L2w	Vascular	2 – 10
6C2s	Abdominal, OB/GYN, Pediatrics	2 – 6
8L2	Vascular	2 – 8
E14C4	Prostate	4 – 14
