Patient Portal Module
Powered by MyVue

Access. Share. Manage.

Put Your Patients in Control.

The power of together.

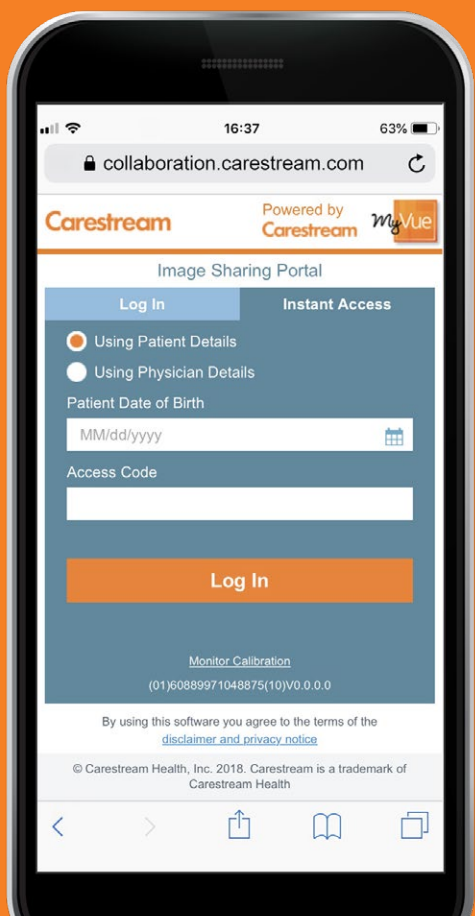

The power of together.

Let Your Patients Play a Role in Their Own Care.

The Patient Portal Module empowers patients to access, share and help manage their own images and exam data – using a range of familiar, user-friendly browser-enabled devices. It also allows real-time collaboration between patients and healthcare providers – helping to eliminate the need for duplicate exams and the production of CDs, DVDs or films. Bottom line? Potential hours and dollars saved.

Advantages At a Glance

- Easy, electronic image access and sharing helps support earlier diagnoses and enhanced care.
- Security protocols help ensure that images remain private and secure – accessed only by those granted permission.
- The service helps eliminate the time and money wasted burning CDs or transporting film.
- Patients feel included in the management of their healthcare.

Harness the Power of Virtual Sharing.

The Patient Portal Module allows sharing of imaging results between facilities, patients and physicians. This enables collaborative workflow and empowers patients to control and manage their own health records. In addition to improving patient access, the Patient Portal Module can help eliminate the need to focus staff and equipment resources on producing CDs, DVDs or films.

With the Patient Portal, a unique and secure log-in code is provided to patients after exams are performed. They can then access exam images and data from a variety of Web browser-enabled devices. Full reports can be viewed based on the facility's policy. Once registered, patients can grant permission to the individuals and facilities with whom they wish to share their images and data.

Benefits of the Patient Portal Module Go Beyond Replacing CDs and DVDs.

- This Carestream technology fully complements existing EHR patient-portal strategy.
- The service can help eliminate duplicate radiographic exams from various providers, reducing patients' radiation exposure.
- A fully electronic process means potential cost savings for imaging facilities, patients and insurance companies.
- The convenience of this portal can support greater patient satisfaction.
- Patient Portal is an extension of the Clinical Collaboration Platform Enterprise Viewer Module, which has FDA Clearance for mobile use and for clinical readings of images and ECG waveforms.

Trusted Partner.

With thousands of sites and multiple Cloud data centers implemented globally, our services team is passionate about supporting you from day one. We have extensive knowledge in a variety of professional services: project management, integration, training, data migration and technical support. With this expertise and experience, along with 24/7 Remote Management Services monitoring your system, you can feel confident choosing Carestream as your partner in Imaging IT.

Access, Manage, Share. Anywhere.

- Patients go online to access their exam results through a secure login.
- Imaging records, including final diagnostic reports, are managed from a Web-enabled device.
- Patients choose and authorize those with whom they wish to share their images.

Carestream's Clinical Collaboration Platform.

Intuitive clinical content-management workflow across the entire enterprise.

Clinical Collaboration Platform gives all those who provide, manage, receive and reimburse care the ability to access the clinical data and images they need – using the preferred platform and screen for each workflow and setting.

Through full integration with the enterprise's electronic medical or health record, meaningful clinical data within its appropriate context is always available for delivery to key stakeholders. Across disparate sites and networks. Between departments and information technologies. Among providers and payers. Around each episode of care and each patient's clinical history.

Carestream does more than integrate data and systems. We allow each stakeholder to view the patient's complete imaging record, including priors – closing knowledge gaps that would otherwise be created by disjointed systems and data sources. We enable transparency. And we help your teams collaborate around a shared goal: putting patients at the center of efficient, effective healthcare.

Want to learn more about the Platform?

Visit carestream.com/collaboration to see how *the power of together* can help you provide true patient-centric care.

Carestream also offers leading-edge image capture solutions across a wide array of modalities. The gold standard in X-ray film. And, when it comes to digital output, our laser imagers and self-service kiosk provide high-quality solutions for all imaging modalities.

A Community of Service and Support.

For dependable service, look for our Customer Success Network. We work continuously to improve your imaging performance, help you to innovate as needs change, and make the most of your budget and resources. Carestream's Customer Success Network surrounds you with a dynamic team of experts, with a Single Point of Entry for easy, customized access to the right people in every situation. You and your patients will benefit from the expertise and best practices only Carestream can deliver – based on thousands of customer engagements worldwide and our 100-year heritage in medical-imaging innovation.
