Gentle Imaging.
Big Innovations for Little Patients.
A Special Focus on Pediatric Imaging.

Pediatric radiography presents some unique concerns. Imaging systems designed for adults can expose children to more radiation than what’s needed for high-quality images. Children are more vulnerable to radiation-induced cancers. Young patients also have a longer span of years ahead in which malignancies could develop.

In response, government agencies and organizations worldwide have issued guidelines to help imaging facilities develop dose-safety pediatric protocols. Complying with these, without sacrificing image quality or speed, presents a serious challenge. To meet it, you need a holistic, focused solution for pediatric imaging.

Advantages at a Glance

- Integrated hardware and software are tailored to the specific demands of pediatric imaging.
- These systems are designed in strict accordance with dose-safety guidelines.
- Exposure time is automatically determined to use the shortest exposure possible for effective results.
- Results are optimized at every stage of the pediatric imaging chain.

Achieving a Healthy Balance.

You always want the best diagnostic images possible at the lowest dose achievable, especially when the patient is a child.

That’s why Carestream developed our pediatric X-ray solutions – integrated hardware and software tailored to the specific demands of pediatric imaging. These solutions deliver all the efficiency and quality you require, while helping you meet the recommendations of government agencies, such as the Image Gently Alliance for Radiation Safety in Pediatric Imaging, and the safety principles of As Low As Reasonably Achievable (ALARA).

Confidence at Every Step.

Our solutions contribute to the optimal pediatric imaging outcome at every stage of the imaging chain: Image Acquisition, Image Processing and Image Review.

Image Acquisition

Flexible – Carestream pediatric imaging solutions let you tailor exams to individual patient characteristics. Take our CARESTREAM DRX 2530C Detector. Custom-engineered and approved for pediatric applications, its smaller size fits easily into a neonatal incubator X-ray tray, and its cesium iodide (CsI) scintillator is excellent for dose-sensitive pediatric patients. Exposure parameters are automatically adjusted for each patient based on seven age/weight categories from very low birth weight to adolescent. Exposure time is automatically determined to use the shortest exposure possible for effective results.

Fast – Our lightweight and wireless detectors facilitate rapid positioning and easy handling. Overall acquisition time is reduced to a minimum and more personal attention can be dedicated to each child.

Friendly – The CARESTREAM DRX-Evolution and CARESTREAM DRX-Ascend DR suites have removable grids and low absorption tables. Filter wheels in the tube head provide additional X-ray filtration. The DRX-Revolution and DRX-Revolution Nano are ideal for pediatric and NICUs – bringing X-ray to the patients bedside. The Nano’s small footprint allows for easy maneuvering and the articulating arm and small tube head fit under isolettes. Whimsical, child-friendly DRX-Revolution and Nano graphics help put pediatric patients at ease.
Image Processing
Carestream’s proprietary Pediatric Image Optimization and Enhancement Software is designed with small patients in mind. It automatically adjusts and tailors the CARESTREAM EVP Plus image-processing parameters for any one of the seven pediatric body-size categories. In addition, pediatric advance-trauma capability allows your team to work faster when every second counts. Immediate access to pediatric body size will speed workflow in trauma cases when time is of the essence.

Image Review
Carestream’s image-review capabilities allow you to measure and compare exposure and other key parameters for each exam performed. This is ideal for quality education programs and continuous improvement:

• **IEC Exposure Index** allows quick assessment of the amount of radiation used to create the image.
• **Deviation Index** immediately compares the exposure used to your facility’s specific target goal.
• **Dose Reporting** sends data on total dose back to the RIS, including rejects.
• **Total Quality Tool** uses a phantom and software to assure your detector remains within the standards of Image Gently and government guidelines for pediatric imaging.
• **Administrative Analysis and Reporting Software** queries all Carestream systems in the facility and reports exposure levels per exam and per tech, repeat rates, repeat reasons, techniques used and more.

Industry-Leading Performance: Meet Our Family of DRX Detectors.
Our portfolio of DR Detectors includes wireless, shareable and fixed models to meet your demands based on exam type, detector size, dosage level and budget. Discover the right detector for your needs at carestream.com/detectors.
A Community of Service and Support
For dependable service, look to our Customer Success Network. We work continuously to improve your imaging performance, help you to innovate as needs change, and make the most of your budget and resources. Carestream’s Customer Success Network surrounds you with a dynamic team of experts, with a Single Point of Entry for easy, customized access to the right people in every situation. You and your patients will benefit from the expertise and best practices only Carestream can deliver – based on thousands of customer engagements worldwide and our 100-year heritage in medical-imaging innovation.

The Fastest Route to a Successful Imaging Future.
As you travel to the future of imaging, what’s your next step? Maybe you want to move from analog to digital. Perhaps you need to accelerate your X-ray workflow. Or it could be you’re ready to add new imaging modalities to your facility to provide better patient care. Wherever you’re headed, we have the smart solutions you need: Full-digital imaging suites and leading-edge mobile units. Wireless, sharable detectors and CR-to-DR retrofit kits. Affordable CR systems. As well as additional modalities such as Extremity CT and Fluoroscopy.

Start Mapping your Route Today.
Visit carestream.com and start your journey to true patient-centric care.

Carestream also offers a suite of products that support our solutions-based enterprise imaging IT platform. The gold standard in X-ray film. And, when it comes to digital output, our laser imagers, managed print solutions and self-service kiosk provide high-quality solutions for all imaging modalities.
