

Integrated, network-based orthopaedic planning and templating.

CARESTREAM Vue PACS integrates seamlessly with industry-leading OrthoView™ Orthopaedic Digital Planning software. Together, they enable surgeons to perform preoperative planning and templating using digital images. Plus, the solution is scalable to fit the specific needs of a private practice, imaging center, clinic or hospital.

ADVANTAGES AT A GLANCE

- Allows accurate templating in a 100% filmless environment
- Saves costs, with a flexible licensing model
- Includes a comprehensive library of digital prosthesis templates
- Enables convenient templating from local or remote Vue workstations
- Scales to suit facilities of any size
- Simplifies planning with intuitive wizards and automatic one-click or manual scaling
