

Virtual Access Desktop

Powerful image review workstation provides the first step towards softcopy review

Just starting your digital transformation? Carestream Health has a solution for your first step into softcopy image review and management.

Virtual Access Desktop facilitates the transition to a digital environment by equipping technologists, medical staff, and clinical users with basic image review, advanced printing capabilities, and short-term storage.

As an affordable entry-tier workstation, Virtual Access Desktop offers efficient, centralized softcopy review. It enables healthcare facilities and satellite locations to easily view and output patient images captured with KODAK Computed Radiography (CR) or Digital Radiography (DR) Systems.

Tools to enhance image viewing and printing

The comprehensive toolset includes edge enhancement to improve visualization of bone and lung structures, a scrolling feature for viewing long-length CR images, and true-size printing.

Users can customize print outputs with headers and footers, or optimize film use with non-matrix print layouts.

Results distribution

To further reduce or eliminate costs associated with printing films, patient studies can be burned to CD/DVDs for storage and distribution with the optional CD Direct feature. An embedded application can be launched, enabling advanced image viewing.

Advantages at a glance

- ▶ Affordable, entry-tier workstation
- ▶ Complete toolset
- ▶ Optimized printing
- ▶ Optional CD distribution

Key Features of the Virtual Access Desktop

- ▶ Fully integrated low-cost viewing station, compatible with KODAK DIRECTVIEW CR and DR and KODAK DRYVIEW Laser Imagers
- ▶ Flexibility to receive, store, review, and output images from any DICOM-compliant modality
- ▶ Enables review, storage, distribution, and printing of images to improve image access, optimize film use, and reduce film costs
- ▶ Intuitive interface that is quick to learn and easy to use
- ▶ Enriched diagnostic capability with a set of integrated measurement and manipulation tools, such as zoom, crop, pan, window width/level, invert, cine, and a wide range of measurements (distances and angles)
- ▶ Ability to scroll long-length images

Recommended Hardware

- ▶ Pentium IV 1.8 GHz
- ▶ 2 GB RAM
- ▶ 80 + 160 GB HD
- ▶ WINDOWS XP
- ▶ CD/DVD writer
- ▶ UPS
