

KODAK CARESTREAM Hosted Information Management

Maximize your plans for functional business continuity and help ensure data access with image and information storage solutions from Kodak.

Improve the storage, retrieval, and security of your digital images and information with KODAK CARESTREAM Hosted Information Management. Take your choice of data-storage options to facilitate business continuity—and expand archiving capacity without the cost of equipment ownership and maintenance costs. Count on us to provide your organization with a business continuity solution to help you successfully recover from catastrophic data loss. Preserve access to your information and images with Kodak's CARESTREAM Hosted Information Management.

Storage Options

Meet image and information security and storage requirements with a choice of options:

- ▶ Duplicate the data stored in your onsite archive at a secure offsite facility with Kodak's data protection service. As part of your business continuity plan, this cost-effective solution provides access to your information and images in the event of a loss of data.
- ▶ Complement your onsite systems with a dedicated remote archiving solution provided by Kodak. We'll maintain and backup the archive, integrate it with your workflow, and provide real-time storage and retrieval with a secure telecommunications link suited to your needs and budget. And we'll update the archive as needed to keep pace with advancing technologies at no additional cost to you. You'll enjoy all the benefits of worry-free data storage without the capital cost or staff support associated with archive ownership.

Business Continuity Planning

Kodak can help you prepare and implement a business continuity plan to assist your recovery from loss of images and information.

- ▶ Our staff of workflow optimization consultants and our Information Management experts will work with you to assess your current image and information systems. We identify vulnerabilities and then will apply Lean and other principles to the data collected, in order to identify areas for improvement to safeguard your data.
- ▶ Based on your system assessment, Kodak will help you develop an effective business continuity plan to minimize the effects of an event.
- ▶ We'll help you implement your plan with solutions that may include personnel training, data archiving, and data management to meet your requirements and goals.

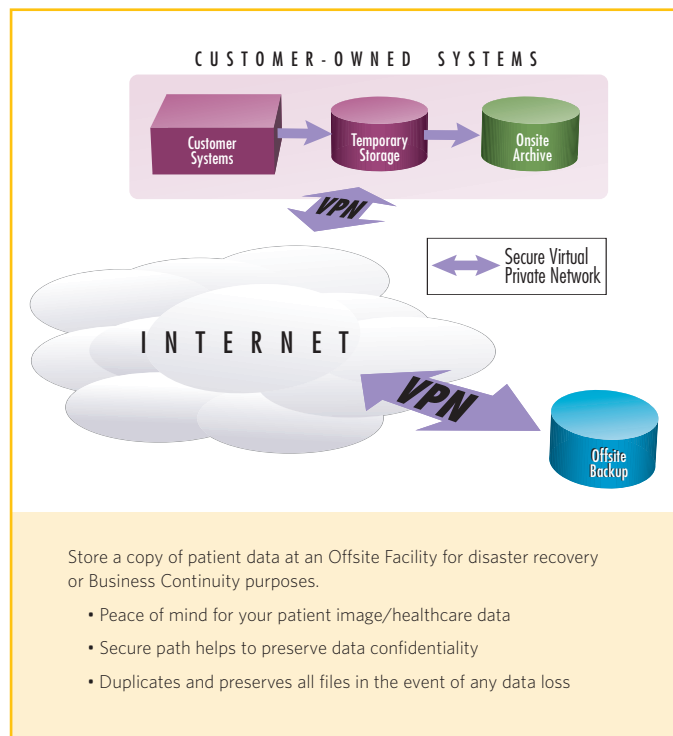

Data Management

Maintain access to information in the face of changing storage technologies or media damage with Kodak's data management services.

- ▶ Our data migration service will transfer images and information from your legacy system to any standards based storage device. This will help optimize workflow, lower ownership cost, and provide continued data availability. Your solution also will provide a framework for future data management based on operational and regulatory requirements.
