Carestream Product Security Advisory | VxWorks - URGENT/11

Title: Critical vulnerabilities in devices using VxWorks OS - URGENT/11
Advisory ID: CARESTREAM-2019-03
Issue Date: August 15, 2019
Last Revision Date: October 16, 2019

What is the URGENT/11 vulnerability?
The Armis research team, Armis Labs, have discovered 11 zero day vulnerabilities in VxWorks®, the most widely used operating system you may never heard about. VxWorks is used by over 2 billion devices including critical industrial, medical and enterprise devices. Dubbed “URGENT/11,” the vulnerabilities reside in VxWorks’ TCP/IP stack (IPnet), impacting all versions since version 6.5, and are a rare example of vulnerabilities found to affect the operating system over the last 13 years. Armis has worked closely with Wind River®, the maintainer of VxWorks, and the latest VxWorks 7 released on July 19 contains fixes for all the discovered vulnerabilities.

Six of the vulnerabilities are classified as critical and enable Remote Code Execution (RCE). The remaining vulnerabilities are classified as denial of service, information leaks or logical flaws. URGENT/11 is serious as it enables attackers to take over devices with no user interaction required, and even bypass perimeter security devices such as firewalls and NAT solutions. These devastating traits make these vulnerabilities ‘wormable,’ meaning they can be used to propagate malware into and within networks. Such an attack has a severe potential, resembling that of the EternalBlue vulnerability, used to spread the WannaCry malware.

Oct. 1st, 2019 update:
The FDA released an update to this vulnerability, listing additional 3rd party components that are affected:

- VxWorks (by Wind River)
- Operating System Embedded (OSE) (by ENEA)
- INTEGRITY (by Green Hills)
- ThreadX (by Microsoft)
- ITRON (by TRON Forum)
- ZebOS (by IP Infusion)

Additional Information related to 10/1/19 FDA update:

FDA’s safety communication can be found here: https://www.fda.gov/medical-devices/safety-communications/urgent11-cybersecurity-vulnerabilities-widely-used-third-party-software-component-may-introduce

Are Carestream products vulnerable?

The Carestream products listed below were previously identified as vulnerable to URGENT/11, based on the use of the INTEGRITY Real Time Operating System by Green Hills Software. After consultation with Green Hills and testing using the validation tool supplied by ARMIS, Carestream products are not vulnerable to the URGENT/11 set of vulnerabilities.

- Carestream Classic CR System
- Carestream Elite CR System
- Carestream CR 975 System
- Carestream Max CR System
- Carestream Industrex HPX-PRO Portable Digital System
- Carestream Industrex HPX-1 Plus Digital System
- Carestream Industrex HPX-1 CR System
