Objective & Learning outcome

The CARESTREAM PACS update training from previous to latest SW version System Administrator (SA) is designed for Hospital personnel who have been administering the CARESTREAM PACS previous SW version and wish to learn the differences with the latest one. The participant at the training completion will be able to understand and describe the differences of the installed system building blocks between the old and new system software and he will be able to perform the added or modified SA operations including: system check, error detection and problem description.

Training program Content

Training performed by designated Carestream Health specialists in a designated Carestream Health training area with equipment supplied by Carestream Health. The course is structured with theoretical session integrated with wide practical hands on.
