Motion Mobile X-Ray System

# Mobile. Affordable. Upgradable.

Uniquely Designed. Digital Ready.

SMART IMAGING SOLUTIONS

# Affordable Imaging on the Move.

When every patient who needs an imaging exam must be transported to an X-ray room, disadvantages abound. Frail or critically ill patients can experience discomfort or trauma while being moved. Meanwhile, workflow slows. Costs escalate. And exams, diagnoses and treatment can all be delayed.

Now, meet the CARESTREAM Motion Mobile X-ray System. It's a highly affordable, analog mobile unit – small, lightweight and easy to use.

Best of all, it provides you with a simple, cost-effective upgrade to digital whenever you're ready – with the simple addition of our CARESTREAM DRX-Transportable/Lite. It uses a lightweight, wireless tablet to give you complete control of the system and displays your images once you acquire them.

## Advantages at a Glance

- Light, compact and easy to transport.
- Intuitive touchscreen for ease of operation.
- Rapid, precise positioning, thanks to a manual light-beam collimator.
- Fast, easy upgrade to digital with the addition of our lightweight, wireless tablet.

# Designed with Your Needs – and Budget – in Mind.

Many small- and mid-sized facilities have a real need for mobile X-ray capabilities. But their budgets are often stretched too tight as they are. The Motion Mobile System solves both of these issues, making it economically feasible for nearly any facility. Consider its advanced feature set – and consider the value.

## Make a Fast and Easy Transition to Lite.

### Go Digital, Whenever You're Ready.

Simply add the DRX-Transportable System/Lite and its wireless tablet with a DR Detector, and Motion Mobile becomes a full digital system with the image quality and accelerated workflow that only DR imaging can provide. This makes Motion Mobile a highly economical bridge from analog or CR to the performance power of DR.

Bottom line? You can make a quick transition to DR at any time – with no fear of technology obsolescence. Plus, you'll enjoy the confidence of knowing your system will have a long, usable life well into the future.

The DRX-Transportable System/Lite features wireless tablet operation. There's no bulky electronics box required, and no need to work from a fixed console – you can move freely around the exam room. A DR Detector and battery charger complete the system.

# Feature Rich. Digital Ready.

The manual light-beam collimator allows fast, accurate patient positioning.

Optional DAP provides the relevant information needed for monitoring patient X-ray dose.

Your choice of Manual or Anatomical Programmed Radiography (APR) mode provides quick and easy selection of your exam technique.

The eight-inch touchscreen monitor with easy-to-set protocols is simple to learn and use.

The tilt-step feature lifts wheels over small obstacles and allows easier access to elevators.

The 32kW-capacitor discharge generator supports a full range of clinical applications.

## Industry-Leading Performance: Meet Our Family of DR Detectors.

Our portfolio of DR detectors includes wireless, shareable and fixed models to meet your demands based on exam type, detector size, dosage level and budget.

Discover the right detector for your needs at [carestream.com/detectors](http://carestream.com/detectors).

NO MATTER WHICH ROAD YOU'RE ON,  
WE'LL GET YOU WHERE  
YOU NEED TO GO.

SMART IMAGING SOLUTIONS

### The Fastest Route to a Successful Imaging Future.

As you travel to the future of imaging, what's your next step? Perhaps you need to accelerate your X-ray workflow. Or add a new imaging solution to your facility to provide better patient care.

Wherever you're headed, we have the smart solutions you need: Full-digital imaging rooms and leading-edge mobile units. Wireless, shareable detectors and CR-to-DR retrofit kits. Affordable CR systems. Advanced digital imagers and our Managed Print Solutions service. And as always, the gold-standard in X-ray film technology.

### Start Mapping Your Route Today.

From small clinics, urgent care facilities and specialty practices to large hospitals and imaging centers, every facility will find a Carestream solution to meet the most specific needs. Visit [carestream.com](http://carestream.com) and start your journey to greater productivity and a higher standard of patient care.

Carestream also offers Non-Destructive Testing solutions to help ensure quality and safety in the aerospace, petrochemical and other industries, as well as Contract Manufacturing to bring innovative coated products to market.

### A Community of Service and Support.

For dependable service, look to our Customer Success Network. We work continuously to improve your imaging performance, help you to innovate as needs change, and make the most of your budget and resources. Carestream's Customer Success Network surrounds you with a dynamic team of experts, with a Single Point of Entry for easy, customized access to the right people in every situation. You and your patients will benefit from the expertise and best practices only Carestream can deliver.

### Eclipse: Harness the Power of Decades of Innovation.

Carestream's Eclipse is the engine behind our innovative imaging software. It uses AI technology and proprietary algorithms to significantly increase the value of the entire imaging chain, from capture to diagnosis.
