

Compact. Maneuverable. Economical.

SMART IMAGING SOLUTIONS

World-Class Mobile Imaging Made Affordable.

If your facility is operating with a tight budget, but won't compromise when it comes to mobile-imaging performance, here's the solution for you. The DRX-Revolution Mobile X-ray System, powered by DRX Core Detector, offers an advanced feature set that makes it easy to take high-quality images right at the bedside – helping improve patient care while you boost your productivity.

Advantages At a Glance

- Get pristine image quality you can depend on, thanks to a robust generator, dual focal-spot tube and processing.
- So easy to maneuver, you can make a 360-degree turn effortlessly.
- The powerful dual-motor drive makes moving the system effortless – in forward or reverse.
- A long tubehead reach gives you easy access to your patient in crowded rooms.

Powered by the DRX Core Wireless Detector.

DRX Revolution Mobile X-ray System powered by the DRX Core detector

Premium Performance Without the Premium Price.

If you're a small to mid-size hospital, urgent care facility or clinic, you fully appreciate the benefits a DR Mobile Imaging System would deliver – but the cost may have held you back. Here's the answer: The DRX-Revolution Mobile X-ray System, powered by the DRX Core Detector, is an X-ray room on wheels. It delivers the compact size, easy transport and image quality that will quickly make it your go-to solution!

Long tube-head reach and easy positioning speeds exams and boosts productivity.

Low-profile design and fully collapsible column give technologists a clear line of site in crowded hallways.

Allows comparison with prior images, reducing retakes and helping ensure image quality.

Dual-motor drive makes transport quick and easy – and it turns on a dime.

Offers handy on-board storage for hand sanitizer, gloves, extra batteries, markers, bags and lockable storage for the detector.

Small footprint makes the System an easy fit in ORs, ERs, ICUs and small patient rooms.

Wireless DRX Core Detector
Simplifies positioning and eliminates wire and cable-based infection concerns.
