Vue Mammo Workstation and PACS

Women's
Healthcare

Single Desktop Reading to simplify your work

- View Mammography exams, including Digital Breast Tomosynthesis (DBT), General Radiology exams, and related non-DICOM data from a single desktop
- Multi-modality and multi-vendor image support
- Seamless integration with third-party value-added applications
- Choice of display configurations

Optimized Workflow to decrease reading time and fatigue

- Industry-leading mammography tools
- User-configurable and intelligent hanging protocols
- Ease of comparing multiple priors
- Auto-population of diagnostic images upon arrival
- Choice of navigational devices

Scalable to fit your needs today and tomorrow

- Standalone, enterprise, and multi-site environments
- Vue Connect architecture for efficient cross-site reading and workload balancing
- Vue Archive provides patient-centric access to priors

Vendor Neutral to leverage existing investments

- IHE-compliant; integrates through industry-standard protocols
- Automatic pre-fetch of priors

Diagnostic Confidence to improve patient care

- Computer-Aided Detection (CAD)
- Cross-reference lines to aid in locating suspicious areas on opposing views
- Alert to indicate unread images
