A Liberating Force in Medical Imaging Technology.

Vue

The power of together.

Vue

The power of together.

Anytime, Anywhere Data Access.

Clinicians and referring physicians need the freedom to access patient data quickly and efficiently. But the cost barriers and the complexity of owning and maintaining healthcare information systems can compromise the quality of care.

Carestream's Vue Cloud is a liberating force in medical-imaging IT. It releases healthcare organizations from technological, geographic and economic constraints by providing on-demand access to advanced software applications and tools.

Advantages At a Glance

- Achieve a new level of sharing and collaboration.
- Create a virtual community of healthcare professionals. to enhance your standard of care.
- Retain ownership and control of your data.
- Realize lower operating costs.
- Release the hospital from IT complexities to spend more time on patient care.
- Scale up and down effortlessly.
- Ensure your data is protected in Carestream Cloud in case of site issues.

Greater Freedom Means Better Care.

Vue Cloud Services is a new way to deliver simplified, secure, regulatory-compliant IT services on a pay-as-you-go basis. It frees your team from the burden of IT management – allowing you to dedicate more time to patient-care initiatives. Vue Cloud employs state-of-the-art cloud computing, streamlines workflow and integrates seamlessly with regional healthcare-information systems.

Our Cloud offerings provide dependable data protection and transparent access, regardless of the source. We combine the reliability of a company with a 100-year history in medical imaging with the latest in healthcare IT technologies. With our proven platform and dedicated organization, we supply services that can meet your needs in the United States, Europe, Latin America, China, the Middle East and Japan.

Feel the Liberating Power of Vue Cloud Services Throughout Your Organization:

- Avoid capital investment and reduce total cost of ownership by as much as 30% with predictable pay-as-you-go operating costs.
- Protect your organization from technology obsolescence by outsourcing your IT infrastructure needs.
- Empower radiologists, clinicians and referring physicians with anywhere, anytime access to information and the tools that will improve workflow.
- Gain access to a highly available and secure infrastructure, monitored and supported 24/7 by IT experts with clear service-level agreements.
- Stay in control through proactive reporting on usage, activity and status of your data.
- Feel confident with Carestream's experience in managing over 26 billion images in over 12 private and public clouds.

Unlock the Future of Imaging IT.

In essence, cloud-based computing is the conversion of IT to a utility, such as electricity, that is constantly connected and available in your facility. This minimizes the need for complex on-site systems. You also gain maximum security, business continuity and disaster-recovery capabilities. Another plus – Carestream provides all data management.

Experience the Benefits of Vue Cloud Services

Simplicity
Free yourself from management burdens and costs. Eliminate uncertainty in planning and budgeting.

Convenience
Remove barriers to collaborative data-sharing. Scale up and add services anytime. Get continuous access to the latest features.

Security
Ensure data privacy and integrity. Count on full redundancy and rapid failover.

Liberate Your Bottom Line

No hardware obsolescence. No cost for exit migration. No user license limitations. No cost for remote reading.

An Innovative Portfolio.

Archive Services
Vue Cloud Archive Services offer remote, long-term storage, data protection and disaster recovery of any type of critical data, including DICOM, XDS documents, and other PDF, MPEG and JPG formats. It's ideal for organizations looking to outsource their archive in a vendor-neutral environment.

Migration Services
Metadata and data from the legacy archive are taken over and ingested into Vue Cloud. At the customer's request, legacy DICOM data can be cleaned and normalized at ingest time.

Clinical Viewing Services
Cloud-based medical-imaging gives clinicians and referring physicians web-portal access to diagnostic results, including reports and key images.

Diagnostic Reading Services
Diagnostic Reading Services offer radiologists and clinicians Carestream's leading solutions with optional advanced visualization and voice-reporting capabilities. These services are ideal for replacing aging PACS or for organizations looking for a new PACS.

Patient Portal Services
This allows patients to securely access their data through the web portal. Patients are notified when new data becomes available.

Exchange Services
Patient info from multiple sites is consolidated in a global worklist and can be shared between multiple participating institutions, either through DICOM queries or with Vue Cloud Viewing services.

Complete Confidence.

There's strength in numbers – so you'll be glad to know that Carestream manages over 300 customers with multiple sites and 26 billion studies stored in 12 cloud infrastructures globally. And we continue to grow. Our data centers are managed by experts who are leaders in the field – they have extensive knowledge in project management, integration, training, data migration and technical support. We've got all the right certifications. With all this in place, plus 24/7 Remote Management Services monitoring your system, you can choose Carestream with confidence.

WORKFLOW MANAGEMENT CLINICAL REPOSITORY DIAGNOSTIC IMAGE SHARING ANALYTICS

Connecting people and data. Anywhere.

Vue

The power of together.

Carestream's Clinical Collaboration Platform.
Intuitive clinical content-management workflow across the entire enterprise.

Clinical Collaboration Platform gives all those who provide, manage, receive and reimburse care the ability to access the clinical data and images they need – using the preferred platform and screen for each workflow and setting.

Through full integration with the enterprise's electronic medical or health record, meaningful clinical data within its appropriate context is always available for delivery to key stakeholders. Across disparate sites and networks. Between departments and information technologies. Among providers and payers. Around each episode of care and each patient's clinical history.

Carestream does more than integrate data and systems. We allow each stakeholder to view the patient's complete imaging record, including priors – closing knowledge gaps that would otherwise be created by disjointed systems and data sources. We enable transparency. And we help your teams collaborate around a shared goal: putting patients at the center of efficient, effective healthcare.

Want to learn more about the Platform?
Visit carestream.com/collaboration to see how *the power of together* can help you provide true patient-centric care.

Carestream also offers leading-edge image capture solutions across a wide array of modalities. The gold standard in X-ray film. And, when it comes to digital output, our laser imagers and self-service kiosk provide high-quality solutions for all imaging modalities.

A Community of Service and Support.
For dependable service, look to our Customer Success Network. We work continuously to improve your imaging performance, help you to innovate as needs change, and make the most of your budget and resources. Carestream's Customer Success Network surrounds you with a dynamic team of experts, with a Single Point of Entry for easy, customized access to the right people in every situation. You and your patients will benefit from the expertise and best practices only Carestream can deliver – based on thousands of customer engagements worldwide and our 100-year heritage in medical-imaging innovation.
