Manufacturer Disclosure Statement for Medical Device Security -- MDS2

Question ID	Question	DUET DRF	See note
DOC-1	Manufacturer Name	CMT (manufactured for Thales)	
DOC-2	Device Description	DUET DRF	
DOC-3	Device Model	Software Version 1.20.00	
DOC-4	Document ID	Chrono # RAD20_1Y087	REV 2
		х-	
		rayimaging.support@thalesgroup.co	
DOC-5	Manufacturer Contact Information	m	
		Receive Worklist,Send Images With	In order to connect to Worklist,
DOC-6	Intended use of device in network-connected environment:	Patient Data over LAN	Printer and PACS
DOC-7	Document Release Date	March 11, 2020	
	Coordinated Vulnerability Disclosure: Does the manufacturer have a vulnerability disclosure		As part of monthly scanning for new
DOC-8	program for this device?	Yes	vulenrabilties
DOC-9	ISAO: Is the manufacturer part of an Information Sharing and Analysis Organization?	Yes	
	Diagram: Is a network or data flow diagram available that indicates connections to other		
DOC-10	system components or expected external resources?	Yes	
DOC-11	SaMD: Is the device Software as a Medical Device (i.e. software-only, no hardware)?	No	
DOC-11.1	Does the SaMD contain an operating system?	N/A	_
	Does the SaMD rely on an owner/operator provided operating system?		
DOC-11.2		N/A	
	Is the SaMD hosted by the manufacturer?	,	
DOC 11 3	······································	N/A	
DOC-11.3 DOC-11.4	is the CoMD heated by the system of D	N/A	
DOC-11.4	Is the SaMD hosted by the customer?	N/A	
		Yes, No,	
		N/A, or	
		See Note	Note #
	MANAGEMENT OF PERSONALLY IDENTIFIABLE INFORMATION	See Note	Note #
			Full Name,Civil
	Can this device display, transmit, store, or modify personally identifiable information (e.g.		ID,DOB,Gender,BMI,Pregnancy
MPII-1	electronic Protected Health Information (ePHI))?	Yes	Status,Xray Image
MPII-2	Does the device maintain personally identifiable information?	Yes	
	Does the device maintain personally identifiable information temporarily in volatile memory		
MPII-2.1	(i.e., until cleared by power-off or reset)?	Yes	_
MPII-2.2	Does the device store personally identifiable information persistently on internal media?	Yes	—
	Is personally identifiable information preserved in the device's non-volatile memory until	M	
MPII-2.3	explicitly erased?	Yes	

			SQL Localdb storage withou external
MPII-2.4	Does the device store personally identifiable information in a database?	Yes	advvertising
	Does the device allow configuration to automatically delete local personally identifiable		
MPII-2.5	information after it is stored to a long term solution?	Yes	_
	Does the device import/export personally identifiable information with other systems (e.g., a		
MPII-2.6	wearable monitoring device might export personally identifiable information to a server)?	Yes	DICOM communication
	Does the device maintain personally identifiable information when powered off, or during		
MPII-2.7	power service interruptions?	Yes	_
	Does the device allow the internal media to be removed by a service technician (e.g., for		
MPII-2.8	separate destruction or customer retention)?	Yes	
	Does the device allow personally identifiable information records be stored in a separate		
	location from the device's operating system (i.e. secondary internal drive, alternate drive		
MPII-2.9	partition, or remote storage location)?	Yes	
	Does the device have mechanisms used for the transmitting, importing/exporting of		
MPII-3	personally identifiable information?	Yes	
MPII-3.1	Does the device display personally identifiable information (e.g., video display, etc.)?	Yes	_
	Does the device generate hardcopy reports or images containing personally identifiable		
MPII-3.2	information?	Yes	
	Does the device retrieve personally identifiable information from or record personally		
	identifiable information to removable media (e.g., removable-HDD, USB memory, DVD-		
MPII-3.3	R/RW,CD-R/RW, tape, CF/SD card, memory stick, etc.)?	Yes	_
	Does the device transmit/receive or import/export personally identifiable information via		
MPII-3.4	dedicated cable connection (e.g., RS-232, RS-423, USB, FireWire, etc.)?	No	_
	Does the device transmit/receive personally identifiable information via a wired network		
MPII-3.5	connection (e.g., RJ45, fiber optic, etc.)?	Yes	
	Does the device transmit/receive personally identifiable information via a wireless network		
MPII-3.6	connection (e.g., WiFi, Bluetooth, NFC, infrared, cellular, etc.)?	No	_
	Does the device transmit/receive personally identifiable information over an external		
MPII-3.7	network (e.g., Internet)?	No	_
MPII-3.8	Does the device import personally identifiable information via scanning a document?	No	
	Does the device transmit/receive personally identifiable information via a proprietary		
MPII-3.9	protocol?	No	DICOM, HL7 only
	Does the device use any other mechanism to transmit, import or export personally		
MPII-3.10	identifiable information?	No	

AUTOMATIC LOGOFF (ALOF)

The device's ability to prevent access and misuse by unauthorized users if device is left idle for a period of time.

	Can the device be configured to force reauthorization of logged-in user(s) after a		
	predetermined length of inactivity (e.g., auto-logoff, session lock, password protected screen		
ALOF-1	saver)?	Yes	
	Is the length of inactivity time before auto-logoff/screen lock user or administrator		0-1000 Minutes(0 infinity),Default 30
ALOF-2	configurable?	Yes	minutes if activated

AUDIT CONTROLS (AUDT)

	The ability to reliably audit activity on the device.		
	Can the medical device create additional audit logs or reports beyond standard operating		
AUDT-1	system logs?	Yes	
AUDT-1.1	Does the audit log record a USER ID?	Yes	
AUDT-1.2	Does other personally identifiable information exist in the audit trail?	No	
	Are events recorded in an audit log? If yes, indicate which of the following events are		
AUDT-2	recorded in the audit log:	Yes	
AUDT-2.1	Successful login/logout attempts?	Yes	
AUDT-2.2	Unsuccessful login/logout attempts?	No	
AUDT-2.3	Modification of user privileges?	No	
AUDT-2.4	Creation/modification/deletion of users?	No	
AUDT-2.5	Presentation of clinical or PII data (e.g. display, print)?	Yes	
AUDT-2.6	Creation/modification/deletion of data?	Yes	There is a log for deleted images
			ePHI and images, optional to
AUDT-2.7	Import/export of data from removable media (e.g. USB drive, external hard drive, DVD)?	Yes	anonymize
AUDT-2.8	Receipt/transmission of data or commands over a network or point-to-point connection?	Yes	Internal lan to pacs server dicom ePHI
AUDT-2.8.1	Remote or on-site support?	Yes	Team Viewer available
AUDT-2.8.2	Application Programming Interface (API) and similar activity?	N/A	
			Emergency log,by analyzing time on
			logtech can determine what action
AUDT-2.9	Emergency access?	Yes	done
AUDT-2.10	Other events (e.g., software updates)?	Yes	Delete images
AUDT-2.11	Is the audit capability documented in more detail?	No	
AUDT-3	Can the owner/operator define or select which events are recorded in the audit log?	No	
AUDT-4	Is a list of data attributes that are captured in the audit log for an event available?	Yes	Date, Module, Line, Activity
AUDT-4.1	Does the audit log record date/time?	Yes	
	Can date and time be synchronized by Network Time Protocol (NTP) or equivalent time		
AUDT-4.1.1	source?	Yes	
AUDT-5	Can audit log content be exported?	Yes	
AUDT-5.1	Via physical media?	Yes	Manually with technician access
AUDT-5.2	Via IHE Audit Trail and Node Authentication (ATNA) profile to SIEM?	No	
AUDT-5.3	Via Other communications (e.g., external service device, mobile applications)?	No	

AUDT-5.4	Are audit logs encrypted in transit or on storage media?	Yes	encrypt on transit On rest as part of bitlocker
AUDT-6	Can audit logs be monitored/reviewed by owner/operator?	No	Can be reviewed by Field Engineer
AUDT-7	Are audit logs protected from modification?	Yes	no access to log using non-admin personal no access to log using non-admin
AUDT-7.1	Are audit logs protected from access?	Yes	personal
AUDT-8	Can audit logs be analyzed by the device?	No	<u> </u>

AUTHORIZATION (AUTH)

	The ability of the device to determine the authorization of users.		
	Does the device prevent access to unauthorized users through user login requirements or		
AUTH-1	other mechanism?	Yes	passwords
	Can the device be configured to use federated credentials management of users for		
AUTH-1.1	authorization (e.g., LDAP, OAuth)?	Yes	
AUTH-1.2	Can the customer push group policies to the device (e.g., Active Directory)?	No	
AUTH-1.3	Are any special groups, organizational units, or group policies required?	No	
	Can users be assigned different privilege levels based on 'role' (e.g., user, administrator,		
AUTH-2	and/or service, etc.)?	Yes	
	Can the device owner/operator grant themselves unrestricted administrative privileges (e.g.,		
AUTH-3	access operating system or application via local root or administrator account)?	Yes	OEM can cancel this option on site
AUTH-4	Does the device authorize or control all API access requests?	N/A	
			Kiosk mode load directly software as
AUTH-5	Does the device run in a restricted access mode, or 'kiosk mode', by default?	Yes	shell

CYBER SECURITY PRODUCT UPGRADES (CSUP)

	The ability of on-site service staff, remote service staff, or authorized customer staff to install/upgrade device's security patches.		
CSUP-1	Does the device contain any software or firmware which may require security updates during its operational life, either from the device manufacturer or from a third-party manufacturer of the software/firmware? If no, answer "N/A" to questions in this section.	y Yes	
CSUP-2	Does the device contain an Operating System? If yes, complete 2.1-2.4.	Yes	
CSUP-2.1	Does the device documentation provide instructions for owner/operator installation of patches or software updates?	CMT issues FTU for each softwa Yes update	re
CSUP-2.2	Does the device require vendor or vendor-authorized service to install patches or software updates?	Any patch or SW installation mu backed up by a written authoriz No from the vendor	

	Does the device have the capability to receive remote installation of patches or software		
CSUP-2.3	updates?	No	
2.5			
	Does the medical device manufacturer allow security updates from any third-party		
CSUP-2.4	manufacturers (e.g., Microsoft) to be installed without approval from the manufacturer?	No	
CSUP-3	Does the device contain Drivers and Firmware? If yes, complete 3.1-3.4.	Yes	
	Does the device documentation provide instructions for owner/operator installation of		—
CSUP-3.1	patches or software updates?	No	
	Does the device require vendor or vendor-authorized service to install patches or software		
CSUP-3.2	updates?	Yes	
	Does the device have the capability to receive remote installation of patches or software		
CSUP-3.3	updates?	No	
	Does the medical device manufacturer allow security updates from any third-party		
CSUP-3.4	manufacturers (e.g., Microsoft) to be installed without approval from the manufacturer?	No	
CSUP-4	Does the device contain Anti-Malware Software? If yes, complete 4.1-4.4.	Yes	Mcafee application control
	Does the device documentation provide instructions for owner/operator installation of		
CSUP-4.1	patches or software updates?	No	
	Does the device require vendor or vendor-authorized service to install patches or software		
CSUP-4.2	updates?	Yes	
	Does the device have the capability to receive remote installation of patches or software		
CSUP-4.3	updates?	No	
	Does the medical device manufacturer allow security updates from any third-party		
CSUP-4.4	manufacturers (e.g., Microsoft) to be installed without approval from the manufacturer?	No	
	Does the device contain Non-Operating System commercial off-the-shelf components? If yes,		
CSUP-5	complete 5.1-5.4.	Yes	_
	Does the device documentation provide instructions for owner/operator installation of		
CSUP-5.1	patches or software updates?	No	
	Does the device require vendor or vendor-authorized service to install patches or software		
CSUP-5.2	updates?	Yes	_
	Does the device have the capability to receive remote installation of patches or software		
CSUP-5.3	updates?	No	—
	Does the medical device manufacturer allow security updates from any third-party		
CSUP-5.4	manufacturers (e.g., Microsoft) to be installed without approval from the manufacturer?	No	
	Does the device contain other software components (e.g., asset management software,		
	license management)? If yes, please provide details or refernce in notes and complete 6.1-		
CSUP-6	6.4.	No	_
	Does the device documentation provide instructions for owner/operator installation of	N/A	
CSUP-6.1	patches or software updates?	N/A	

CSUP-6.2	Does the device require vendor or vendor-authorized service to install patches or software updates?	N/A
	Does the device have the capability to receive remote installation of patches or software	_
CSUP-6.3	updates?	N/A
	Does the medical device manufacturer allow security updates from any third-party	
CSUP-6.4	manufacturers (e.g., Microsoft) to be installed without approval from the manufacturer?	N/A
		Manufacture to OEM notification as
CSUP-7	Does the manufacturer notify the customer when updates are approved for installation?	Yes part of new version
CSUP-8	Does the device perform automatic installation of software updates?	No
	Does the manufacturer have an approved list of third-party software that can be installed on	n
CSUP-9	the device?	N/A
	Can the owner/operator install manufacturer-approved third-party software on the device	
CSUP-10	themselves?	No
CSUP-10.1	Does the system have mechanism in place to prevent installation of unapproved software?	Yes Mcafee application control
6501 10.1	bes the system have mechanism in place to prevent installation of anapproved software.	Monthly scan for vulenrabities and
		release mitigation if required in new
CSUP-11	Does the manufacturer have a process in place to assess device vulnerabilities and updates?	Yes versions
CSUP-11.1	Does the manufacturer provide customers with review and approval status of updates?	Yes Per request
CSUP-11.2	Is there an update review cycle for the device?	Yes Every SW version release

HEALTH DATA DE-IDENTIFICATION (DIDT)

	The ability of the device to directly remove information that allows identification of a person.	
	Does the device provide an integral capability to de-identify personally identifiable	
DIDT-1	information?	Yes
	Does the device support de-identification profiles that comply with the DICOM standard for	
DIDT-1.1	de-identification?	No

DATA BACKUP AND DISASTER RECOVERY (DTBK)

	The ability to recover after damage or destruction of device data, hardware, software, or site configuration information.	
DTBK-1	Does the device maintain long term primary storage of personally identifiable information / patient information (e.g. PACS)?	No
DTBK-2	Does the device have a "factory reset" function to restore the original device settings as provided by the manufacturer?	Yes

			Backup of database and logs to
DTBK-3	Does the device have an integral data backup capability to removable media?	Yes	analyze issues,can be anonymized
DTBK-4	Does the device have an integral data backup capability to remote storage?	No	
DTBK-5	Does the device have a backup capability for system configuration information, patch restoration, and software restoration?	Yes	
DTBK-6	Does the device provide the capability to check the integrity and authenticity of a backup?	Yes	Checksum exist
	EMERGENCY ACCESS (EMRG)		
	The ability of the device user to access personally identifiable information in case of a medical emergency situation that requires immediate access to stored personally identifiable information.	1	
		N	Restricted Access to only emergency
EMRG-1	Does the device incorporate an emergency access (i.e. "break-glass") feature?	Yes	patient.
	HEALTH DATA INTEGRITY AND AUTHENTICITY (IGAU)		
	How the device ensures that the stored data on the device has not been altered or destroyed		
	in a non-authorized manner and is from the originator. Does the device provide data integrity checking mechanisms of stored health data (e.g., hash		
IGAU-1	or digital signature)?	No	
	Does the device provide error/failure protection and recovery mechanisms for stored health		
IGAU-2	data (e.g., RAID-5)?	Yes	RAID 1 Mirror
	MALWARE DETECTION/PROTECTION (MLDP)		
	The ability of the device to effectively prevent, detect and remove malicious software (malware).		
MLDP-1	Is the device capable of hosting executable software?	Yes	only provided by manufacturer
	Does the device support the use of anti-malware software (or other anti-malware	Vec	McAfee application control, Windows Defender
MLDP-2	mechanism)? Provide details or reference in notes.	Yes	McAfee application control, Windows
MLDP-2.1	Does the device include anti-malware software by default?	Yes	Defender
			The system includes a default anti-
MLDP-2.2	Does the device have anti-malware software available as an option? Does the device documentation allow the owner/operator to install or update anti-malware	N/A	malware so this is N/A
MLDP-2.3	software?	No	
			Changes could be consodered per
MLDP-2.4	Can the device owner/operator independently (re-)configure anti-malware settings?	No	request

MLDP-2.5	Does notification of malware detection occur in the device user interface?	No	
	Can only manufacturer-authorized persons repair systems when malware has been		
MLDP-2.6	detected?	No	
MLDP-2.7	Are malware notifications written to a log?	Yes	Windows Log
	Are there any restrictions on anti-malware (e.g., purchase, installation, configuration,		
MLDP-2.8	scheduling)?	Yes	
	If the answer to MLDP-2 is NO, and anti-malware cannot be installed on the device, are other		
MLDP-3	compensating controls in place or available?	N/A	
	Does the device employ application whitelisting that restricts the software and services that		
MLDP-4	are permitted to be run on the device?	Yes	Could be consodered per request
MLDP-5	Does the device employ a host-based intrusion detection/prevention system?	No	
MLDP-5.1	Can the host-based intrusion detection/prevention system be configured by the customer?	No	
MLDP-5.2	Can a host-based intrusion detection/prevention system be installed by the customer?	No	

NODE AUTHENTICATION (NAUT)

The ability of the device to authenticate communication partners/nodes.		
Does the device provide/support any means of node authentication that assures both the		
sender and the recipient of data are known to each other and are authorized to receive		
transferred information (e.g. Web APIs, SMTP, SNMP)?	Yes	DICOM AE
Are network access control mechanisms supported (E.g., does the device have an internal		
firewall, or use a network connection white list)?	Yes	Windows Firewall
		Technician can change it according
Is the firewall ruleset documented and available for review?	Yes	users requests.
Does the device use certificate-based network connection authentication?	No	_
	Does the device provide/support any means of node authentication that assures both the sender and the recipient of data are known to each other and are authorized to receive transferred information (e.g. Web APIs, SMTP, SNMP)? Are network access control mechanisms supported (E.g., does the device have an internal firewall, or use a network connection white list)? Is the firewall ruleset documented and available for review?	Does the device provide/support any means of node authentication that assures both the sender and the recipient of data are known to each other and are authorized to receive transferred information (e.g. Web APIs, SMTP, SNMP)?YesAre network access control mechanisms supported (E.g., does the device have an internal firewall, or use a network connection white list)?YesIs the firewall ruleset documented and available for review?Yes

CONNECTIVITY CAPABILITIES (CONN)

	All network and removable media connections must be considered in determining appropriate security controls. This section lists connectivity capabilities that may be present on the device.		
CONN-1	Does the device have hardware connectivity capabilities?	Yes	Network, USB Mass storage
CONN-1.1	Does the device support wireless connections?	Yes	For Wireless detector
			Optional for wireless detector WPA2-
CONN-1.1.1	Does the device support Wi-Fi?	Yes	PSK(by HARDWARE AP)
CONN-1.1.2	Does the device support Bluetooth?	No	_
CONN-1.1.3	Does the device support other wireless network connectivity (e.g. LTE, Zigbee, proprietary)? Does the device support other wireless connections (e.g., custom RF controls, wireless	No	 Optional Infrared to configure
CONN-1.1.4	detectors)?	Yes	wireless detector

	Dear the device support physical connections?	Yes	
CONN-1.2	Does the device support physical connections?		—
CONN-1.2.1	Does the device have available RJ45 Ethernet ports?	Yes	
CONN-1.2.2	Does the device have available USB ports?	Yes	
			For Capture service data for analyze
CONN-1.2.3	Does the device require, use, or support removable memory devices?	Yes	or backup/restore configuraion
CONN-1.2.4	Does the device support other physical connectivity?	Yes	Serial ports to generator, keypad
	Does the manufacturer provide a list of network ports and protocols that are used or may be		
CONN-2	used on the device?	Yes	
CONN-3	Can the device communicate with other systems within the customer environment?	Yes	
	Can the device communicate with other systems external to the customer environment (e.g.,		
CONN-4	a service host)?	No	
CONN-5	Does the device make or receive API calls?	No	
CONN-6	Does the device require an internet connection for its intended use?	No	_
CONN-7	Does the device support Transport Layer Security (TLS)?	No	_
CONN-7.1	Is TLS configurable?	N/A	
	Does the device provide operator control functionality from a separate device (e.g.,		
CONN-8	telemedicine)?	No	<u> </u>

PERSON AUTHENTICATION (PAUT)

	The ability to configure the device to authenticate users.		
	Does the device support and enforce unique IDs and passwords for all users and roles		
PAUT-1	(including service accounts)?	Yes	
	Does the device enforce authentication of unique IDs and passwords for all users and roles		
PAUT-1.1	(including service accounts)?	Yes	
	Is the device configurable to authenticate users through an external authentication service		Optional Software only authentication
PAUT-2	(e.g., MS Active Directory, NDS, LDAP, OAuth, etc.)?	Yes	or Active Directory
	Is the device configurable to lock out a user after a certain number of unsuccessful logon		Only when using Windows
PAUT-3	attempts?	See Notes	Authentication
	Are all default accounts (e.g., technician service accounts, administrator accounts) listed in		
PAUT-4	the documentation?	Yes	
PAUT-5	Can all passwords be changed?	Yes	
	Is the device configurable to enforce creation of user account passwords that meet		
PAUT-6	established (organization specific) complexity rules?	Yes	
			Can be configured via Windows
PAUT-7	Does the device support account passwords that expire periodically?	See Notes	settings
PAUT-8	Does the device support multi-factor authentication?	No	_
PAUT-9	Does the device support single sign-on (SSO)?	No	
PAUT-10	Can user accounts be disabled/locked on the device?	Yes	Windows account can be locked
PAUT-11	Does the device support biometric controls?	No	

PAUT-12	Does the device support physical tokens (e.g. badge access)?	No	
PAUT-13	Does the device support group authentication (e.g. hospital teams)?	No	
PAUT-14	Does the application or device store or manage authentication credentials?	Yes	On database
PAUT-14.1	Are credentials stored using a secure method?	Yes	_

PHYSICAL LOCKS (PLOK)

	Physical locks can prevent unauthorized users with physical access to the device from compromising the integrity and confidentiality of personally identifiable information stored on the device or on removable media	
PLOK-1	Is the device software only? If yes, answer "N/A" to remaining questions in this section.	No
	Are all device components maintaining personally identifiable information (other than	
PLOK-2	removable media) physically secure (i.e., cannot remove without tools)?	Yes
	Are all device components maintaining personally identifiable information (other than	
PLOK-3	removable media) physically secured behind an individually keyed locking device?	Yes
	Does the device have an option for the customer to attach a physical lock to restrict access to)
PLOK-4	removable media?	Yes

ROADMAP FOR THIRD PARTY COMPONENTS IN DEVICE LIFE CYCLE (RDMP)

	Manufacturer's plans for security support of third-party components within the device's life cycle.	
	Was a secure software development process, such as ISO/IEC 27034 or IEC 62304, followed	
RDMP-1	during product development?	Yes
	Does the manufacturer evaluate third-party applications and software components included	
RDMP-2	in the device for secure development practices?	Yes
	Does the manufacturer maintain a web page or other source of information on software	
RDMP-3	support dates and updates?	No
RDMP-4	Does the manufacturer have a plan for managing third-party component end-of-life?	No

SOFTWARE BILL OF MATERIALS (SBoM)

A Software Bill of Material (SBoM) lists all the software components that are incorpor into the device being described for the purpose of operational security planning by the healthcare delivery organization. This section supports controls in the RDMP section.		
SBOM-1	Is the SBoM for this product available?	Yes
SBOM-2 SBOM-2.1 SBOM-2.2	Does the SBoM follow a standard or common method in describing software components? Are the software components identified? Are the developers/manufacturers of the software components identified?	Yes Yes Yes

IEC 62304 compliant

	—
5	 On database
5	_

IEC 62304, IEC 27799 followed
-
_
—

CDOM 2 2	Are the major version numbers of the software components identified?	Vec	
SBOM-2.3	Are the major version numbers of the software components identified?	Yes	—
SBOM-2.4	Are any additional descriptive elements identified?	Yes	—
	Does the device include a command or process method available to generate a list of	N.,	
SBOM-3	software components installed on the device?	No	<u> </u>
SBOM-4	Is there an update process for the SBoM?	Yes	IEC 62304 checklist
	SYSTEM AND APPLICATION HARDENING (SAHD)		
	The device's inherent resistance to cyber attacks and malware.		
SAHD-1	Is the device hardened in accordance with any industry standards?	Yes	DOD STIG Levels
			The manufacture Facility receive
SAHD-2	Has the device received any cybersecurity certifications?	See Notes	ISO27001 Certification
SAHD-3	Does the device employ any mechanisms for software integrity checking	Yes	_
	Does the device employ any mechanism (e.g., release-specific hash key, checksums, digital		
SAHD-3.1	signature, etc.) to ensure the installed software is manufacturer-authorized?	Yes	Hashing on software version
	Does the device employ any mechanism (e.g., release-specific hash key, checksums, digital		
SAHD-3.2	signature, etc.) to ensure the software updates are the manufacturer-authorized updates?	Yes	Hashing on softwareupdate version
	Can the owner/operator perform software integrity checks (i.e., verify that the system has		
SAHD-4	not been modified or tampered with)?	No	
	Is the system configurable to allow the implementation of file-level, patient level, or other		
SAHD-5	types of access controls?	No	_
SAHD-5.1	Does the device provide role-based access controls?	Yes	
	Are any system or user accounts restricted or disabled by the manufacturer at system		Administrator user is disabled,
SAHD-6	delivery?	Yes	Guest user is renamed and disabled
SAHD-6.1	Are any system or user accounts configurable by the end user after initial configuration?	Yes	_
	Does this include restricting certain system or user accounts, such as service technicians, to		
SAHD-6.2	least privileged access?	Yes	By LOR software settings
	Are all shared resources (e.g., file shares) which are not required for the intended use of the		
SAHD-7	device disabled?	Yes	
	Are all communication ports and protocols that are not required for the intended use of the		
SAHD-8	device disabled?	Yes	
	Are all services (e.g., telnet, file transfer protocol [FTP], internet information server [IIS],		
SAHD-9	etc.), which are not required for the intended use of the device deleted/disabled?	Yes	
	Are all applications (COTS applications as well as OS-included applications, e.g., MS Internet		
SAHD-10	Explorer, etc.) which are not required for the intended use of the device deleted/disabled?	Yes	
	Can the device prohibit boot from uncontrolled or removable media (i.e., a source other than		
SAHD-11	an internal drive or memory component)?	Yes	
5, TID 11	an internal affect of memory componenty.		—

SAHD-12	Can unauthorized software or hardware be installed on the device without the use of physical tools?	No	Hardware by screwdriver,software cannot be installed without field engineer
	Does the product documentation include information on operational network security		
SAHD-13	scanning by users?	No	
			We can consider hardening requests, such as registry changes, block
SAHD-14	Can the device be hardened beyond the default provided state?	Yes	services, etc.
SAHD-14.1	Are instructions available from vendor for increased hardening?	No	
SHAD-15	Can the system prevent access to BIOS or other bootloaders during boot?	Yes	Password Access
SAHD-16	Have additional hardening methods not included in 2.3.19 been used to harden the device?	No	_
	SECURITY GUIDANCE (SGUD)		

	Availability of security guidance for operator and administrator of the device and	
	manufacturer sales and service.	
SGUD-1	Does the device include security documentation for the owner/operator?	Yes
	Does the device have the capability, and provide instructions, for the permanent deletion of	
SGUD-2	data from the device or media?	Yes
SGUD-3	Are all access accounts documented?	Yes
SGUD-3.1	Can the owner/operator manage password control for all accounts?	Yes
	Does the product include documentation on recommended compensating controls for the	
SGUD-4	device?	No

HEALTH DATA STORAGE CONFIDENTIALITY (STCF)

The ability of the device to ensure unauthorized access does not compromise the integrity and confidentiality of personally identifiable information stored on the device or removable		
	media.	
STCF-1	Can the device encrypt data at rest?	Yes
STCF-1.1	Is all data encrypted or otherwise protected?	Yes
STCF-1.2	Is the data encryption capability configured by default?	Yes
STCF-1.3	Are instructions available to the customer to configure encryption?	Yes
STCF-2	Can the encryption keys be changed or configured?	Yes
STCF-3	Is the data stored in a database located on the device?	Yes
STCF-4	Is the data stored in a database external to the device?	No

TRANSMISSION CONFIDENTIALITY (TXCF)

	The ability of the device to ensure the confidentiality of transmitted personally identifiable information.	
	Can personally identifiable information be transmitted only via a point-to-point dedicated	
TXCF-1	cable?	No
	Is personally identifiable information encrypted prior to transmission via a network or	
TXCF-2	removable media?	Ye
TXCF-2.1	If data is not encrypted by default, can the customer configure encryption options?	No
	Is personally identifiable information transmission restricted to a fixed list of network	
TXCF-3	destinations?	Ye
TXCF-4	Are connections limited to authenticated systems?	Ye
TXCF-5	Are secure transmission methods supported/implemented (DICOM, HL7, IEEE 11073)?	No

TRANSMISSION INTEGRITY (TXIG)

	The ability of the device to ensure the integrity of transmitted data.		
	Does the device support any mechanism (e.g., digital signatures) intended to ensure data is		
TXIG-1	not modified during transmission?	No	_
			Serial connection to generator, CAN
TXIG-2	Does the device include multiple sub-components connected by external cables?	Yes	bus connection to Remote table

	REMOTE SERVICE (RMOT)		
	Remote service refers to all kinds of device maintenance activities performed by a service person via network or other remote connection.		
RMOT-1	Does the device permit remote service connections for device analysis or repair?	Yes	_
RMOT-1.1	Does the device allow the owner/operator to initiative remote service sessions for device analysis or repair?	Yes	_
RMOT-1.2	Is there an indicator for an enabled and active remote session?	See Notes	Indication appears when using high previlige sessions
RMOT-1.3	Can patient data be accessed or viewed from the device during the remote session?	Yes	_
RMOT-2	Does the device permit or use remote service connections for predictive maintenance data?	No	_
RMOT-3	Does the device have any other remotely accessible functionality (e.g. software updates, remote training)?	No	_

OTHER SECURITY CONSIDERATIONS (OTHR)

NONE
